

# OP-FRM-0028 – Motor Installation Details Form

Operations | Planning

Security Class: Public – Social Media

ICP No.	
Application Form No.	

(Supplementary information to be used in conjunction with a PowerNet Installation Connection Application)

## Section 1 – Installation Details to be completed by Applicant:

Applicant Name:		Type of Premises:	
Location of Premises:		Rapid/Street No:	Road/Street Name:
			Locality:

## Schedule of Motors to be installed, to be completed by Applicant:

	No. of this type/use	Phase	Size (kW)	Type e.g Squirrel Cage or NEMA type or similar industry description	Starting			Power Factor Correction		Will Motor be used for braking/plugging	Can/will start simult. with Motor No(s)	Load characteristic, and any other relevant information  For motors larger than 100kW it is desirable that full details of motor characteristics for starting and running are provided, i.e. manufacturer's information/specifications
					Method e.g DOL, Start/Delta Soft Start	Characteristics Starting Amps time Delay Seconds % of Full Load	No. of starts per day	Bulk	Individual			
1										Yes/No		
2										Yes/No		
3										Yes/No		
4										Yes/No		
5										Yes/No		
6										Yes/No		
7										Yes/No		
8										Yes/No		
9										Yes/No		
10										Yes/No		

## Section 2 – Approval to be completed by PowerNet Limited:

Approval to install motors as above is given in the belief there will be no adverse effects at your point of connection to the PowerNet network, but if this should eventuate you may still be held responsible for any remedial costs.

This approval is limited to the effects at the network connection point, and does not consider any effects that may occur within your own installation.
