1. Introduction

OtagoNet Joint Venture is subject to price-quality regulation under Part 4 of the Commerce Act 1986. The Commerce Commission has set a Default Price-Quality Path (DPP) which applies to OtagoNet Joint Venture from 1 April 2020.

This annual compliance statement is published in accordance with clause 11.4 of the 2020 DPP Determination, and applies to the third assessment period, commencing 1 April 2022 and ending 31 March 2023.

2. Date prepared

This statement was prepared on 29 June 2023.

3. Wash-up amount

3.1 Statement of compliance

As demonstrated in Table 1 in Section 3.2, and consistent with clause 8.6 of the 2020 DPP Determination OtagoNet Joint Venture has complied with the wash-up amount calculation for the third assessment period.

3.2 Wash-up amount calculation

Table 1

Wash-up amount RY23		
Term	Description	Value (\$000)
Actual allowable revenue (AAR)	<i>Sum of actual net allowable revenue, actual pass-through and recoverable costs</i>	34,697
Actual revenue (AR)	<i>Sum of actual revenue from prices plus other regulated income</i>	32,612
Revenue foregone (RV)	<i>Actual net allowable revenue x (revenue reduction percentage - 20%) when revenue reduction percentage is greater than 20%, otherwise nil</i>	-
Wash-up amount	<i>AAR - AR - RV</i>	2,084

Further information supporting actual allowable revenue is included in Section 3.2.1.

Further information supporting actual revenue is included in Section 3.2.2.

Further information supporting revenue foregone is included in Section 3.2.3.

3.2.1 Actual allowable revenue

Table 2 below shows the actual allowable revenue for the assessment period consistent with Schedule 1.6 of the 2020 DPP Determination.

Table 2

Actual allowable revenue RY23		
Term	Description	Value (\$000)
Actual net allowable revenue (ANAR)	<i>Amount calculated in accordance with Schedule 1.6 of the Determination for the third assessment period</i>	29,072
Actual pass-through costs	<i>Sum of all pass-through costs that were incurred or approved by the Commission in the assessment period</i>	370
Actual recoverable costs	<i>Sum of all recoverable costs that were incurred or approved by the Commission in the assessment period</i>	5,828
Revenue wash-up drawn down amount	<i>The opening wash-up account balance of the previous period multiplied by WACC²</i>	(574)
Total actual allowable revenue (AAR)	<i>Actual net allowable revenue + actual pass-through costs and actual recoverable costs + revenue wash-up drawn down amount</i>	34,697

Further information supporting actual net allowable revenue, actual pass-through costs, actual recoverable costs and the revenue wash-up drawn down amount is included in Appendix A.

3.2.2 Actual revenue

Table 3 below shows actual revenue for the assessment period consistent with clause 4.2 of the 2020 DPP Determination.

Table 3

Actual revenue RY23		
Term	Description	Value (\$000)
Actual revenue from prices	<i>Actual prices between 1 April 2022 and 31 March 2023 multiplied by actual quantities for the assessment period</i>	32,695
Other regulated income	<i>Other income associated with supply of electricity distribution services</i>	(83)
Total actual revenue (AR)	<i>Sum of actual revenue from prices plus other regulated income</i>	32,612

Further information supporting actual revenue from prices is included in Appendix B.

3.2.3 Revenue foregone

Table 4 below shows the revenue foregone consistent with clause 4.2 of the 2020 DPP Determination.

Table 4

Revenue foregone RY23		
Term	Description	Value (\$000)
Actual net allowable revenue (ANAR)	<i>Amount calculated in accordance with Schedule 1.6 of the Determination for the third assessment period</i>	29,072
Revenue reduction percentage (RRP)	<i>1 - (actual revenue from prices / forecast revenue from prices)</i>	-0.85%
Revenue foregone (RV)	<i>Actual net allowable revenue x (RRP- 20%) when RRP is greater than 20%, otherwise nil</i>	-

4. Quality standards

4.1 Statement of compliance with planned interruptions quality standards

OtagoNet Joint Venture is subject to a planned accumulated SAIDI limit and a planned accumulated SAIFI limit which are assessed for the DPP regulatory period as stated in clause 9.2 of the 2020 DPP Determination.

Table 5 and Table 6 below show the planned accumulated SAIDI and SAIFI limits for OtagoNet Joint Venture for the DPP regulatory period and the planned SAIDI and SAIFI assessed values for the third assessment period.

Table 5

Planned interruptions quality standard - SAIDI	
Sum of planned SAIDI assessed values ≤ Planned accumulated SAIDI limit	
Planned accumulated SAIDI limit	2,114.43
Cumulative Planned SAIDI assessed value for the first, second and third assessment period	462.40
Compliance result	Compliant

Table 6

Planned interruptions quality standard - SAIFI	
Sum of planned SAIFI assessed values ≤ Planned accumulated SAIFI limit	
Planned accumulated SAIFI limit	9.6212
Cumulative Planned SAIFI assessed value for the first, second and third assessment period	2.3612
Compliance result	Compliant

Further information supporting planned SAIDI and SAIFI assessed values is included in Section 4.1.1.

4.1.1 Planned SAIDI and SAIFI assessed values

Table 7 and Table 8 below show OtagoNet Joint Venture’s planned SAIDI, and SAIFI assessed values for the assessment period.

Table 7

Planned SAIDI assessed value RY23		
Term	Description	Value
Class B non-notified interruptions		1.24
Class B notified interruptions falling outside window		21.19
SAIDI _B	<i>Sum of Class B non-notified interruptions</i>	22.43
Class B notified interruptions falling inside window		233.39
Class B intended interruptions cancelled without notice		10.76
Class B intended interruptions cancelled with notice		-
SAIDI _N	<i>Sum of Class B notified interruptions</i>	244.15
Planned SAIDI assessed value	$SAIDI_B + (SAIDI_N/2)$	144.50

Table 8

Planned SAIFI assessed value RY23		
Term	Description	Value
Planned SAIFI assessed value	<i>Sum of Class B interruptions commencing within the assessment period</i>	0.8640

4.2 Statement of compliance with unplanned interruptions quality standards

As demonstrated in Table 9 and Table 10 below, and consistent with clause 9.7 of the 2020 DPP Determination, OtagoNet Joint Venture has complied with the unplanned interruptions quality standard.

Table 9

Unplanned interruptions quality standard RY23 - SAIDI		
Unplanned SAIDI assessed value ≤ Unplanned SAIDI limit		
Unplanned SAIDI limit		160.35
Unplanned SAIDI assessed value	<i>Sum of normalised SAIDI values for Class C interruptions commencing within the assessment period</i>	143.82
Compliance result		Compliant

Table 10

Unplanned interruptions quality standard RY23 - SAIFI		
Unplanned SAIFI assessed value ≤ Unplanned SAIFI limit		
Unplanned SAIFI limit		2.4172
Unplanned SAIFI assessed value	<i>Sum of normalised SAIFI values for Class C interruptions commencing within the assessment period</i>	1.7704
Compliance result		Compliant

Information about policies, procedures and calculations for measuring planned and unplanned interruptions during the assessment period is in Appendix C.

4.2.1 Major events

Table 11 below shows the SAIDI, and SAIFI values attributed to major events which occurred during the assessment period.

The SAIDI unplanned major event boundary value is 11.81

The SAIFI unplanned major event boundary value is 0.1776

Further information about major events is included in Appendix D.

Table 11

Unplanned SAIDI major events RY23			
Start	End	Pre-normalised unplanned SAIDI	Normalised unplanned SAIDI
21 May 2022 12:00pm	22 May 2022 13:30pm	14.034	1.071
13 June 2022 04:30am	15 June 2022 11:30am	41.144	1.550
17 July 2022 14:00pm	19 July 2022 11:00am	15.231	2.862
20 March 2023 04:30am	23 March 2023 03:30am	50.184	2.559

Unplanned SAIFI major events RY23			
Start	End	Pre-normalised unplanned SAIFI	Normalised unplanned SAIFI
13 June 2022 14:30pm	15 June 2022 03:30am	0.1961	0.0200
31 August 2022 9:30am	2 September 2022 08:30am	0.1856	0.0081

4.3 Statement of compliance with extreme event standard

As demonstrated in Table 12 below, and consistent with clause 9.9 of the 2020 DPP Determination OtagoNet Joint Venture has complied with the extreme event standard.

Table 12

Extreme event standard RY23	
<i>Unplanned SAIDI value ≤ 120 minutes, and customer interruption minutes ≤ six million during any 24-hour period, excluding unplanned interruptions from major external factors</i>	
Number of extreme events	Compliance result
0	Compliant

4.4 Quality Incentive Adjustment

Table 13 below shows OtagoNet Joint Venture's quality incentive adjustment for the assessment period.

Table 13

Quality Incentive Adjustment RY23		
Term	Description	Value (\$000)
SAIDI planned adjustment	$(SAIDI_{planned, target} - SAIDI_{planned, assessed}) \times 0.5 \times IR$	(7.68)
SAIDI unplanned adjustment	$(SAIDI_{unplanned, target} - SAIDI_{unplanned, assessed}) \times IR$	(103.25)
Total adjustment	$SAIDI_{planned adjustment} + SAIDI_{unplanned adjustment}$	(110.94)
Revenue at risk	$0.02 * ANAR$	581.43
Total penalty/reward		(110.94)
67th percentile estimate of post-tax WACC		4.23%
Quality incentive adjustment		(120.52)

Table 14 below shows OtagoNet Joint Venture's quality incentive adjustment inputs consistent with Schedule 4 of the 2020 DPP Determination.

Table 14

Quality Incentive Adjustment Inputs RY23					
Term	Units	Value	Term	Units	Value
SAIDI planned interruption cap	minutes	422.89	SAIDI unplanned interruption cap	minutes	160.35
SAIDI planned interruption collar	minutes	-	SAIDI unplanned interruption collar	minutes	0
SAIDI planned interruption target	minutes	140.96	SAIDI unplanned interruption target	minutes	120.02
Planned SAIDI assessed value	minutes	144.50	Unplanned SAIDI assessed value	minutes	143.82
Incentive rate		4,339			
Actual net allowable revenue (ANAR)	\$000	29,072			
SAIDI planned interruption target	minutes	140.96	SAIDI unplanned interruption target	minutes	120.02
Minimum of the planned SAIDI cap and assessed value	minutes	144.50	Minimum of the unplanned SAIDI cap and assessed value	minutes	143.82
Planned SAIDI subject to incentive	Minutes	(3.54)	Unplanned SAIDI subject to incentive	minutes	(23.80)
Adjustment (IR x 0.5)	\$	2,170	Adjustment (IR)	\$	4,339
SAIDI planned adjustment	\$000	(7.68)	SAIDI unplanned adjustment	\$000	(103.25)

5. Transactions

OtagoNet Joint Venture has not entered into any agreements with another EDB or Transpower for an amalgamation, merger, major transaction, or transfer in the assessment period.

6. Director's certification

A Director's certificate in the form set out in Schedule 7 of the 2020 DPP Determination is included as Appendix E.

7. Assurance report

An assurance report meeting the requirements of Schedule 8 of the 2020 DPP Determination is included in Appendix F.

Appendix A – Pass-through and recoverable costs

Actual Net Allowable Revenue

Table 15

Actual net allowable revenue RY23		
Term	Description	Value (\$000)
ANAR 2021/2022	Actual net allowable revenue for the year ending 2022	27,145

Appendix C – Policies and procedures for measuring planned and unplanned interruptions

OtagoNet Joint Venture contracts PowerNet to manage its network via a Network Management Agreement. PowerNet has a range of quality-controlled documentation that govern the operational processes that surround the interruption, restoration and quality of supply to its customers and by which power interruptions are managed, recorded and reported at PowerNet.

The below processes and documentation are designed to cover the relevant information relating to the recording and reporting of SAIDI and SAIFI.

- OP-SC01 System Control Faults/Defects Processes
- OP-SC02 System Control Outages Processes
- OP-SC04 System Control Reporting Processes
- OP-STD-005 Planned Outages and Operating Orders Standard
- OP-STD-0001 Network Faults, Defects and Supply Complaints Standard
- OP-STD-011 Operating Sequence Standard

Key information includes:

- Responsibilities and critical tasks for preparation, checking, actioning and altering operating sequences.
- Responsibilities for recording faults and unplanned interruptions at the system control operator level, through to reviewing and reporting of faults and interruptions.
- Methods by which notification of unplanned interruptions are identified and captured from various sources such as customers, network equipment, contractors, Transpower, the public or emergency services.
- The use of operating sequences for planned maintenance and unplanned fault restoration and how the information from these orders flow through to the Outage Reporting System in the form of duration of power interruptions and the number of customers affected.
- The method of notifying customers of planned or notified planned interruptions, including where and how this information is stored for future reference.
- The method of calculating raw SAIDI and SAIFI for both planned and unplanned interruptions.
- The process for uploading raw data extracted from the Outage Reporting System to calculate SAIDI and SAIFI assessed values, including the normalisation of unplanned major events.
- The preparation, retention and archiving of supporting records and data.

PowerNet interprets an “Interruption” (as defined in the Default Price-Quality Path Determinations) as the loss of power to a single consumer due to a single root cause. Cases where a customer receives multiple power cuts during the remediation of a single root cause are considered single interruptions for the purposes of SAIFI calculation. This interpretation maintains consistency with the approach used to calculate the quality limits under which OtagoNet Joint Venture operates.

The process for operating sequence reporting related to planned outages is described below.

When an Operating Sequence Number record is created in the ORS database application, there are a number of checks before the record can be saved. This particularly applies to an Operating Sequence that is for a ‘Planned Interruption’ that involves an ‘ICP Outage’.

All of the fields need to be populated except the 'Project Number' and 'Project Manager'.

If the 'Alternate Date Requirement' flag is set to 'Alternate Date Not Required', then the 'Alt Date Off', 'Time Off', 'Alt Date On' and 'Time On' can be left blank.

Once the 'Interruption Window' is populated with a 'Date Off' and 'Time Off' the duration (in minutes) is displayed and the 'Must Publish Before' dates and time are populated by the application for 'Planned & Notified' and 'Regular Planned' options.

The calculation of the 'Must Publish Before' date for the interruption to be considered as 'Planned and Notified' takes into account the number of available workdays before the Planned Interruption. This excludes Saturdays and Sundays, as well as any Public Holiday recorded in the ORS System. These Public Holiday Dates are published by the EA. There are notes on how the ORS System uses these 'Must Publish Before' dates later in this document.

There are a number of date checks (in addition to the required fields needing to be populated), around the dates and times that are entered. If any of these checks fail, the Operating Sequence record cannot be saved. These checks include:

1. The Interruption window must be at least 60 minutes in the future
2. The Date / Time Off is not too far in the future (365 days)
3. The Date/Time On must be after the Date/Time Off
4. The minimum duration of the Interruption Window is 30 minutes
5. The maximum duration of the Interruption Window is two days (2880 mins)
6. If an 'Alternate Date Available' has been selected, the Alternate Date must be after the initial Date/Time on

This is also the option to enter an expected duration. If this option is chosen, the value entered must be less than the length of the Interruption Window.

After the Operating Sequence record is saved, the operator can add the details of network equipment to be used, and select the ICP's that will be involved. The interruption can then be published, provided it is to occur less than 56 days in the future.

Parameter	Value	Unit
Start Offset	60	mins (60)
Max Future Days	365	days (365)
Max Future Pub Days	56	days (56)
Min Interruption Dur	30	mins (30)

When a Planned Interruption is Published the EIEP5 records are created by the ORS System and automatically transferred to the Registry Hub. In addition the ORS System creates the data on PowerNet Limited's Outage Web page so that customers can enquire on the Outage.

The Outage Planning Manager takes a screen capture of the PowerNet Limited Outage Web Page and saves the file as an audit record of the Web Page publishing process.

The Registry Hub delivers the EIEP5 files to the retailers (25 traders) and if successful, creates an '.AKE' file to confirm the Hub has received the file and can deliver it, and a '.CONFIRM' file that shows when the EIEP5 file is in the Traders Inbox. These '.AKE' and '.CONFIRM' files are downloaded by PowerNet Limited's IT Systems and stored as an audit record.

As part of the ORS System, the date/time the last '.CONFIRM' file is received is recorded, as well as the date/time that the PNL Outage Web Site Screen Capture file was created. The later date of these two Date/Time stamps is considered as the Operating Sequence Publish Confirmation Time for the individual Operating Sequence. This time

is compared to the previously recorded 'Must Publish Before' times, to determine if the record can be treated as a 'Planned & Notified', 'Regular Planned', or 'Unplanned' Interruption.

This process is programmatically automated for Planned Interruptions provided there are 25 EIEP5 files sent, 25 EIEP5 Confirmation records received, and 1 PowerNet Limited Web Site Screen Capture records. If there are more or less than these numbers, the process is currently handled by an IT Administration person.

In addition to these processes, PowerNet Limited Administration Reception Staff currently view each Web Site Screen Capture and manually enter the Operating Sequence Number, the Interruption Start Date and the Number of ICPs Affected. This process allows the ORS System to verify OJV have a screen dump for each Planned Interruption and that the file is named correctly (linked to the correct Operating Sequence record). This allows OJV to create a new screen capture if required, ideally before the 'Must Publish Before' 'Planned & Notified' date, so that the Interruption is entitled to the 50% reduction in SAIDI for any minutes that occur within the interruption window.

Power Outage - Manual Validation of Website data

This process is required to ensure PowerNet have an Audit record of the Power Outage web site publication. When you enter this form only new records will be shown. Click on the '1. Link' and a saved image will open that displays the Audit record. From this image please enter:

- Outage Reference Number
- The Start Date of the Interruption
- The number of customers affected.

If you unsure of any details or something seems incorrect, enter a comment into the '5. Data Question / Comment' box

After you have entered these details you can click the right arrow to move to the next record and repeat the process.

Unplanned Outage Recording Process

Unplanned shutdowns are recorded in PowerNet's Outage Recording System (ORS) that qualify for the recording of SAIFI & SAIDI.

Once an unplanned shutdown to customers has been established either by Scada CB tripping's or customer calls of no power an Operating Sequence (O/S) number is created with a unique number. Once an O/S has been completed and the customers power has been restored, recording of the outage in the ORS can commence.

The data is entered from the Operating Sequence into an ORS record as per the record below. Start times are recorded from either: 1st call received from a customers, Supervisory Control and Data Acquisition (Scada), trip CB time, time field operator turns off power to customers.

This is number of unique ICP's (each ICP is only counted once for the Outage) N N This is that total number of ICP's from each Stage, added up.

Staged restorations to customers power supply are recorded within the same ORS recorded as above. Staged restoration times are recorded from Scada or times that are relayed to System Control Operator from a Field Operator.

If another Feeder or Substation is affected, then we may create a separate record for this and link it to the original record.

Appendix D – SAIDI and SAIFI major events

The table below shows the normalisation of the SAIDI major events that took place during the assessment period, consistent with Schedule 3.2 of the 2020 DPP Determination.

		41.144			1.550

- (i) Cause; Extreme high winds – also includes:
Defective equipment
Third Party Interference
Vegetation
- (ii) Start date; 13/06/22
- (iii) Start time; 04:30
- (iv) End date; 15/06/22
- (v) End time; 11:30
- (vi) SAIDI before; 41.144
- (vii) SAIDI normalised; 1.550
- (viii) Location; Waihola, Lawrence, Elderlee St, Hyde, Port Molyneux, Owaka, Hills, Ranfurly, Oteruhua and Clinton substations
- (ix) Equipment; Various – including:
Broken overhead LV conductor
Blown 11 kV fuse
Tree on line
Broken cross arm
- (x) Response; Isolate relevant sections. Repair and restore power
- (xi) Mitigating factors; Mostly extreme wind
- (xii) Proposed mitigation; Inspection and scheduled maintenance

Normalisation of unplanned SAIDI major events RY23					
SAIDI unplanned boundary value					11.81
1/48th of the SAIDI unplanned boundary value	Half hour commencing	Sum SAIDI (half-hour)	Sum SAIDI (previous 24-hour)	Max SAIDI (rolling 24-hour)	SAIDI assessed value

		15.231			2.862

- (i) Cause; Extreme high winds
- (ii) Start date; 17/07/22
- (iii) Start time; 14:00
- (iv) End date; 19/07/22
- (v) End time; 11:00
- (vi) SAIDI before; 15.231
- (vii) SAIDI normalised; 2.862
- (viii) Location; Clarks, Middlemarch, Waiholā, Palmerston, Merton, Waitati, Lawrence, Elderlee, North Balclutha, Clinton, Stoneburn, Owaka, Kaitangata substations
- (ix) Equipment; Failed insulators and tree contact and failed equipment
- (x) Response; Locate and repair and replace equipment
- (xi) Mitigating factors; Extreme high wind
- (xii) Proposed mitigation; Continued overhead line inspection; substation inspection; Infrared survey

Normalisation of unplanned SAIDI major events RY23					
SAIDI unplanned boundary value					11.81
1/48th of the SAIDI unplanned boundary value	Half hour commencing	Sum SAIDI (half-hour)	Sum SAIDI (previous 24-hour)	Max SAIDI (rolling 24-hour)	SAIDI assessed value

		50.184			2.559

- (i) Cause; Extreme high wind
- (ii) Start date; 20/03/23
- (iii) Start time; 04:30
- (iv) End date; 23/03/23
- (v) End time; 03:30
- (vi) SAIDI before; 50.184
- (vii) SAIDI normalised; 2.559
- (viii) Location; Charlotte St, Pukeawa, Greenfield, Hindon, Clydevale, Clarks, Finegand, Middlemarch, Port Molyneux, Waiholā, Palmerston, Merton, Waitati, Lawrence, Elderlee, North Balclutha, Becks, Clinton, Stoneburn, Owaka, Kaitangata substations,
- (ix) Equipment; Various – including:
Failed 33kV connection
Blown 11 kV fuse
Vegetation
Broken wire and cross arm
Broken poles
- (x) Response; Isolate, inspect, repair or replace
- (xi) Mitigating factors; Deterioration, extreme high wind
- (xii) Proposed mitigation; Substation inspections and infra-red surveys. Pole inspections

Appendix E – Director’s certificate

Director Certification (Clause 11.5(d))

I, Peter William Moynihan, being a director of a company, which is a party to the OtagoNet Joint Venture certify that, having made all reasonable enquiry, to the best of my knowledge and belief, the attached annual compliance statement of OtagoNet Joint Venture, and related information, prepared for the purposes of the *Electricity Distribution Services Default Price-Quality Path Determination 2020* has been prepared in accordance with all relevant requirements.

Peter William Moynihan

29 June 2023

Independent Assurance Report

To the Governing Committee of OtagoNet Joint Venture

Assurance report pursuant to Electricity Distribution Services Default Price-Quality Path Determination 2020 (consolidated 20 May 2020)

Opinion

We have undertaken a reasonable assurance engagement in respect of the compliance of OtagoNet Joint Venture (the “Joint Venture”) with the Electricity Distribution Services Default Price-Quality Path Determination 2020 consolidated 20 May 2020 (“the Determination”) in preparing the Annual Compliance Statement for the assessment period ended 31 March 2023.

In our opinion, in all material respects:

- As far as appears from an examination, the information used in the preparation of the Annual Compliance Statement has been properly extracted from the Joint Venture’s accounting and other records, and has been sourced, where appropriate, from its financial and non-financial systems; and
- The Joint Venture has complied with clauses 11.5 and 11.6 of the Determination in preparing the Annual Compliance Statement for the assessment period ended 31 March 2023.

Basis for Opinion

We have conducted our engagement in accordance with Standard on Assurance Engagements (SAE) 3100 (Revised) *Compliance Engagements* (“SAE 3100 (Revised)”), issued by the New Zealand Auditing and Assurance Standards Board.

We believe the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

The Governing Committee’s Responsibilities

The Governing Committee is responsible on behalf of the joint venture for:

- the preparation of the Annual Compliance Statement under clause 11.4 and in accordance with the requirements in clauses 11.5 and 11.6 of the Determination; and
- the identification of risks that may threaten compliance with the Determination and for such internal controls that would mitigate those risks and monitoring the Joint Venture’s ongoing compliance.

Our Independence and Quality Control

We have complied with the Professional and Ethical Standard 1 *International Code of Ethics for Assurance Practitioners (including International Independence Standards) (New Zealand)* or other professional requirements, or requirements in law or regulation, that are at least as demanding, which include independence and other requirements founded on the fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

In accordance with the Professional and Ethical Standard 3 (Amended) *Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance Engagements* or other professional requirements, or requirements in law or regulation, that are at least as demanding, our firm maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards, and applicable legal and regulatory requirements.

We are independent of the Joint Venture. Our firm carries out other services for the Joint Venture in the areas of the areas of compliance with the Electricity Distribution (Information Disclosure) Determination 2012, other regulatory requirements of the Commerce Act 1986, regulatory advisory and our capacity as auditors. The provision of these other services has not impaired our independence.

Assurance Practitioner's responsibilities

Our responsibility is to express an opinion on whether the Joint Venture has complied, in all material respects, with clause 11.5(e) and schedule 8(1)(b)(vi) and 8(1)(c) of the Determination are to express an opinion on whether:

- as far as appears from our examination, the information used in the preparation of the Annual Compliance Statement has been properly extracted from the Joint venture's accounting and other records, sourced from its financial and non-financial systems; and
- the Annual Compliance Statement, for the assessment period ended 31 March 2023, has been prepared, in all material respects, in accordance with the requirements in clauses 11.5 and 11.6 of the Determination.

SAE 3100 (Revised) requires that we plan and perform our procedures to obtain reasonable assurance about whether the Joint Venture has complied, in all material respects, with the Determination, in preparing the Annual Compliance Statement for the assessment period ended 31 March 2023.

In relation to the wash-up amount set out in clause 8.6 of the Determination, our procedures included recalculation of the wash-up amount in accordance with schedule 1.6 of the Determination and assessing it against the amounts and disclosures contained on pages 4 to 6 and 13 to 20 of the annual Compliance Statement.

In relation to the quality standards set out in clause 9 of the Determination, our procedures included examination, on a test basis, of evidence relevant to the values and disclosures contained on pages 7 to 10 and 21 to 43 of the Annual Compliance Statement.

In relation to the quality incentive adjustment set out in Schedule 4 of the Determination, our procedures included recalculation of the quality incentive adjustment in accordance with Schedule 4 of the Determination and assessing it against the amounts and disclosures contained on pages 11 to 12 of the Annual Compliance Statement.

An assurance engagement to report on the Joint Venture's compliance with the Determination involves performing procedures to obtain evidence about the compliance activity and controls implemented. The procedures selected depend on our judgement, including the identification and assessment of risks of material non-compliance.

Inherent Limitations

Because of the inherent limitations of an assurance engagement, together with the internal control structure, it is possible that fraud, error or non-compliance may occur and not be detected. A reasonable assurance engagement throughout the specified period does not provide assurance on whether compliance with the determination will continue in the future.

Use of Report

This report has been prepared for the Governing Committee in accordance with of the clause 11.5 (e) of the Determination and is provided solely to assist you in establishing that compliance requirements have been met.

Our report should not be used for any other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility for any reliance on this report to anyone other than the Governing Committee of the Joint Venture, as a body, or for any purpose other than that for which it was prepared.
