

## HS-POL-0003 – Health & Safety Statement

Health, Safety & Environment - HSE

Security Class: Public – Social Media

Management of electricity network infrastructure involves work that is skilled, complex and potentially hazardous. People and equipment can be put at risk if safety is not foremost in our thinking. The protection of people and the environment is considered in every decision we make and in every action we take.

### We are committed to:

- Providing a safe and healthy work environment
- Supporting our people to stop work and pause for safety when someone feels unsafe
- Contributing as individuals to our safety-first culture
- Ensuring the electricity networks that we manage do not put communities or businesses at risk

### Achieving objectives through:

- Managing any activities with high potential injury consequences by implementing critical controls
- Ensuring our vehicles, plant, and equipment are fit for purpose, well maintained and safe for use
- Engaging our people through leadership, consultation, communication and partnerships
- Having well-trained people that understand what they do and how they do it
- Engaging with the public to increase their awareness of risks
- Collaborating with the industry to enhance safety standards
- Committed to fulfil all legal requirements
- Continually striving for improvement of the Health and Safety Management System to create a safer workplace and networks
- Implementing effective systems

### Supported and endorsed by PowerNet and Network Safety Leaders:

<b>Bob Taylor</b> PowerNet Chair		<b>Peter Moynihan</b> PowerNet HSE Board Committee Chair
