

Line Charge Price Changes

Electricity Invercargill Limited (EIL) time-of-use (ToU) pricing for residential and general connections to retailers and their customers effective from 1 April 2024.

The way electricity is being consumed in New Zealand is changing. Increased uptake of smart appliances, electric vehicles, solar panels and decarbonisation is all affecting the way we use electricity. EIL is committed to ensuring customers have the best opportunity to take advantage of these changes with a method that it is fair to all customers.

We want our customers to have a choice about how and when they use electricity and the price they pay for it.

EIL invoices retailers (who send you your electricity accounts) for the use of our electricity network. We own and manage the assets that get power to your door – the poles, wires, transformers and substations. Our line charges are around a quarter of your overall electricity account. We also pass on Transpower's charges, which are for using the national transmission network (often called the national grid). Transmission charges can vary between regions but are around 10% of your overall electricity account. Retailers then invoice customers for all electricity costs, and choose how to repackage the distribution and transmission charges into their pricing.

EIL's ToU pricing means that the line charges will be lower at shoulder and night times. This is to better reflect the costs of electricity distribution and transmission. Peak times are 7am-11am and 5pm-9pm (Monday-Sunday), when high electricity use puts the most pressure on the local and national networks. Outside of these times is shoulder and night times, and the line charges are lower, ToU pricing offers you the ability to reduce your energy costs by moving some electricity use to non-peak times. It also means more options when using new technology such as solar generation, electric vehicles and battery storage. To take advantage of ToU pricing you'll need a compatible smart meter, and your energy retailer to have a suitable pricing plan; line charges are only one part of the price you pay for electricity. Please contact your retailer to understand what options they may be offering.

Use electricity during shoulder and night hours and save on power.

Contact your retailer to find out if you can take advantage of EIL's ToU pricing.

The variable rates shown apply to the kWh Purchases as metered at the Transpower Grid Exit Point.

Peak is defined as 0700 - 1100 hours and 1700 - 2100 hours | Shoulder is defined as 1100 - 1700 hour and 2100 - 2300 hours | Night is defined as 2300 - 0700 hours.

This line charge notification is for all Residential customers and General customers up to a contract capacity of 100kVA. Customers over 100kVA are assessed on an individual basis. Changes to prices this year relate to an increase in the Transmission charges and EIL has increased the distribution prices in line with Commerce Commission Default Price-Quality Path regulations.

Further information relating to line charges can be found at the following web URL <https://powernet.co.nz/disclosures/electricity-invercargill-ltd/all-line-charges/>

* These tariffs options require a 32 amp circuit breaker to be installed on the meter board.
