

Pursuant to the Electricity Distribution Information Disclosure Determination 2012, OtagoNet Joint Venture hereby gives notice that the following line charges will apply for Installation Control Points (ICPs) as from 1 April 2024.

The new and existing line charges for ICPs in the OtagoNet area are shown below. Changes to prices are driven by an increase in Transmission and an increase in Distribution charges in line with the Commerce Commission Default Price-Quality Path regulations.

The line charges do not include metering charges and are GST exclusive.

Further information relating to line charges can be found at the following web URL <https://powernet.co.nz/disclosures/electricity-southland-ltd/all-line-charges/>

Electricity consumers should note that these are the line charges as charged to the electricity retailers. Individual electricity retailers will make their own decisions whether to adjust their retail prices to consumers to reflect any changes in the line charges.

Standard Residential Connections				New Prices Effective from 1 April 2024			Current Prices Effective to 31 March 2024

**Residential definition** - a residential consumer is where the consumer's metered point of connection to the network is for the purposes of supplying a home (the principle place of residence of the consumer), not normally used for any business activity and not used as a holiday home or out building. The connection must meet the definition of "Domestic premises" under Section 5 of the Electricity Industry Act 2010.

**Control Period Demand (CPD)** - each general connection ICP greater than 2kVA will have an individually assessed kW demand level calculated each year. The annually assessed CPD level will be effective from 1 April each year.

**Summer/Winter**

Winter - 1 May to 30 September

Summer - 1 October to 30 April

**Notes**

+ Unmetered connection.

++ Unmetered Builders Temporary Supply must have 20A MCB fitted to switch board.

**Losses 400V**
