

Pursuant to the Electricity Distribution Information Disclosure Determination 2012, OtagoNet Joint Venture hereby gives notice that the following line charges will apply for Installation Control Points (ICPs) as from 1 April 2026.

The new and existing line charges for ICPs in the OtagoNet area are shown below. Changes to prices are driven by an increase in transmission and an increase in distribution charges in line with the Commerce Commission Default Price-Quality Path Regulations.

The line charges do not include metering charges and are GST exclusive.

Further information relating to line charges can be found at the following web URL <https://powernet.co.nz/disclosures/electricity-southland-ltd/all-line-charges/>

Electricity consumers should note that these are the line charges charged to the electricity retailers. Individual electricity retailers will make their own decisions on whether to adjust their retail prices to consumers to reflect any changes in the line charges.

***Distributed Generation Injection Variable Price**

The volume prices apply to distributed generation injected into the distribution network during ***peak periods by DG connections approved by the network. Distributed Generation Export Variable Price applies to all residential and general connections of 41kVA and below with an export capacity of less than 45kW and volumes submitted in the half hour format (HHR).

****DG Peak Periods** - Peak periods for distributed generation injection are: May to September, 7am to 10am and 5pm to 9pm

Residential definition - a residential consumer is where the consumer's metered point of connection to the network is for the purposes of supplying a permanently fixed home (the principle place of residence of the consumer), not normally used for any business activity and not used as a holiday home or outbuilding. The connection must meet the definition of "Domestic premises" under Section 5 of the Electricity Industry Act 2010.

Control Period Demand (CPD) - each general connection ICP greater than 2kVA will have an individually assessed kW demand level calculated each year. The annually assessed CPD level will be effective from 1 April each year.

Summer/Winter

Winter - 1 May to 30 September
 Summer - 1 October to 30 April

Notes

+ Unmetered connection.
 ++ Unmetered Builders Temporary Supply must have 20A MCB fitted to switch board.
