

HS-POL-0003 – Health, Safety & Environment Statement

Health, Safety & Environment - HSE

Security Class: Public – Social Media

Management of electricity network infrastructure involves work that is skilled, complex and potentially hazardous. People, equipment and the environment can be put at risk if safety is not foremost in every decision we make, and in every action we take.

WE ARE COMMITTED TO

- Providing a work environment that prioritises the health (both physical and mental) and safety of “People”, being PowerNet employees, contractors and the communities we serve
- Creating a positive culture that encourages our employees and contractors to say “If it’s not safe, don’t do it, find another way”
- Contributing as individuals to our safety first culture
- Ensuring the electricity networks that we manage do not put the communities PowerNet serves at risk

ACHIEVING OBJECTIVES THROUGH

- Managing critical risks by implementing controls based on good industry practice
- Ensuring our vehicles, plant and equipment are fit for purpose, well maintained, and safe for use
- Engaging our people through effective leadership, consultation, communication and partnerships
- Providing safety training so our employees can undertake their work safely
- Ensuring contractors have the required competencies to access electricity network infrastructure
- Engaging with the public to increase their awareness of electrical hazards
- Collaborating with the industry to enhance safety standards and share learnings
- A commitment to fulfil all legal requirements
- Continually striving for improvement of the Health and Safety Management System to create a safer workplace and networks aligned with international good practice
- One of the ways we will achieve this is through proactive auditing and reporting
